EXPERIENCE

Senior Software Engineer Apr 2024 – Present

App Next Day · Remote

- Founded a mobile product company focused on rapid native iOS app delivery — from customer brief to shipped Xcode project.
- Built **XC Wizard**: production macOS/iOS platform in Swift, TypeScript, and Node.js (SwiftUI, Next.js, Cloudflare Workers + PostgreSQL).
- Shipped Sign in with Apple, StoreKit 2 IAP, APNs push, real-time WebSockets, and App Store Connect automation.

Software Engineer May 2023 – Apr 2024

Zapp · London

- Led architectural discussions around mobile infrastructure and code review for consistency across the codebase.
- Led a mid-size remote team to implement an entirely new design standard.
- Translated business requirements into development roadmaps and timelines.
- Built CI/CD pipelines and testing frameworks with CircleCI.

Software Engineer Mar 2021 – Apr 2023

Train Effective · London

- Complete mobile app redesign — built a **component library** in React Native and NPM while keeping legacy designs in sync.
- Analytics dashboard: React/Bootstrap front-end, Node.js back-end.
- Maintained legacy mobile app in React Native and Node.js.
- Integrated Firebase, Elasticsearch, Algolia, Stripe, Mailchimp, and SAML.

Summer Technology Analyst Jun 2019 – Aug 2019

Barclays · London

- Implemented user preferences in Java on legacy banking systems; prepared Jira/Kanban workflow and release process.

Spring Technology Analyst Aug 2018 – Sep 2018

Morgan Stanley · London

- Designed a trade-recommendation system for B2B clients in a collaborative team setting.
- Applied NLP and AI techniques to generate trade ideas from market data.

EDUCATION

Higher Education

BSc Engineering - 2:1 (*First-year: First Class*)

University of Warwick · 2017 – 2020

A-Level

Mathematics - A · Philosophy - A (*194/200 UMS*) · Physics - B

Sharnbrook Upper School · 2015 – 2017

EXTRACURRICULARS

Apple Developer Community

2019 – Present

WWDC annually; early SwiftUI, StoreKit 2, and SIWA in production.

Indie App Builder

Ongoing

Solo **TrakStar Music** — React Native, design, App Store release.

Warwick Engineering Society

2017 – 2020

Hackathons, bridge-building comps, rapid prototyping nights.

Mobile Release Craft

Ongoing

Personal focus on App Store submission, release ops, screenshots, and production polish.

AI Product Experiments

Ongoing

Prototyping automation and AI-driven product ideas beyond day-job app work.

Open Source Exploration

Ongoing

Testing new tooling, SDKs, and mobile workflows to stay sharp across the Apple ecosystem.

PROFILE

Expert iOS engineer with 8+ years shipping mobile products across React Native and native Apple tooling. Built across Train Effective, Zapp, and App Next Day, with deep release, platform, and integration expertise beyond the JavaScript layer.

PLATFORMS

Build Targets

iOS, Android, watchOS, visionOS

Native Depth

Swift native modules, App Clips, Widgets, APNs, Sign in with Apple, StoreKit, code signing

CORE SKILLS

Mobile

React Native, TypeScript, JavaScript, Expo

Apple

Swift, SwiftUI, Xcode, StoreKit, Sign in with Apple, APNs

Backend

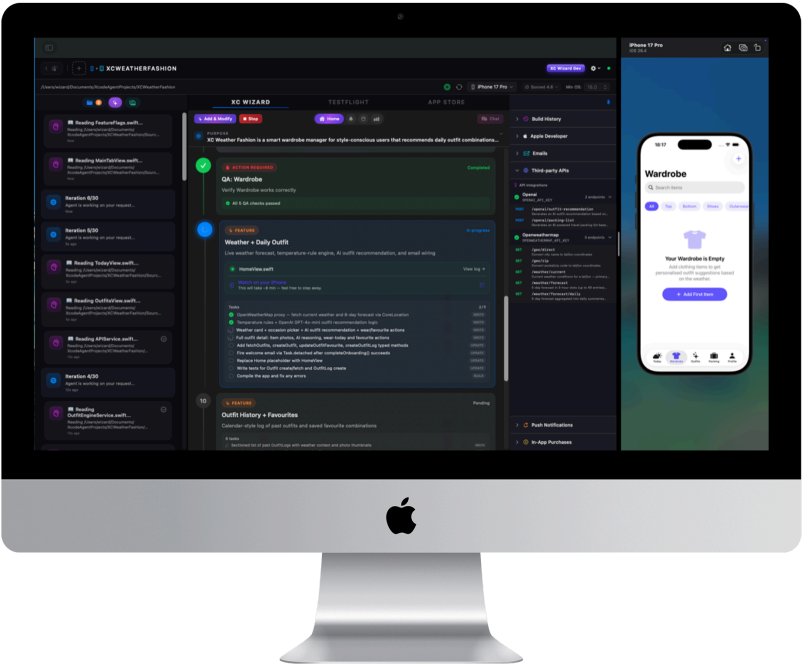

Node.js, GraphQL, REST, Firebase

Tools

CircleCI, Sentry, Stripe, Algolia, Git, App Store Connect

HIGHLIGHTS

- 3 React Native apps live on the App Store
- Built & launched a full mobile product platform solo
- Component library powering a full app redesign
- Native module work and end-to-end App Store & Play Store release ownership

XC Wizard

PLATFORM

- Native app factory — SwiftUI macOS, Node.js, per-app cloud backends
- SIWA, StoreKit 2, APNs, ASC automation, Stripe billing
- Planner + task execution pipeline for turning prompts into shipped native app projects
- Build history, QA loops, and iterative file-level app generation
- Cloudflare Workers, Neon/Postgres, and per-app backend provisioning
- Third-party API exploration, billing, and App Store submission workflow support
- Realtime, storage, auth, notifications, and purchase capability scaffolding
- Designed to take an app from brief to production-ready Xcode output

xcwizard.com

TrakStar REACT NATIVE

Music

- Solo build · Spotify + Apple Music APIs
- Now playing, queue, App Store release
- Shipped end-to-end: product, design, and release

Zapp ENGINEER

- Mobile infra + redesign
- CI/CD, release systems
- Improved shipping speed across a high-frequency commerce app

zapp.com

Train Effective REACT NATIVE

- StoreKit 2 subscriptions
- In-app purchase flow
- Owned billing UX and release-ready subscription plumbing

Code signing

TestFlight

Sentry

Zapp ENGINEER

- Mobile infra + redesign
- Worked on fast, polished consumer ordering flows
- Helped harden the app for frequent releases

zapp.com

Zapp ENGINEER

- CI/CD, release systems
- Improved build, deploy, and QA reliability
- Supported faster iteration across the mobile team

zapp.com

Train Effective REACT NATIVE

- StoreKit 2 subscriptions
- Implemented payroll logic and entitlement flows

traineffective.com

Train Effective REACT NATIVE

- In-app purchase flow
- Handled sandbox testing and edge-case billing states

traineffective.com

TrakStar REACT NATIVE

- Solo build, App Store
- Designed and shipped independently

App Store ↗

TrakStar REACT NATIVE

- Now playing + queue
- Built the listening experience and core playback UX

App Store ↗

IN SHORT

I'm an iOS engineer who ships — from React Native product work at Zapp and Train Effective to building XC Wizard and TrakStar solo. I own the full stack around mobile: native modules, billing, App Store Connect, and store release. Open to senior iOS roles where someone needs to take a product over the line.
