EXPERIENCE

Senior Software Engineer · Xcode · Apple Developer · Cloudflare · Agents
Apr 2024 – Present
App Next Day · Remote

- Built an **iOS software factory** — 1,500+ advanced Xcode projects, brief to shipped app in up to 24h.
- Built **Xcode Wizard** in Swift, TypeScript, and Node.js: macOS SwiftUI client, agent pipeline, per-app cloud backends.
- Full **Apple ecosystem**: SwiftUI, SIWA, StoreKit 2, Apple Pay, APNs, ASC automation, certificates, code signing.
- Cloudflare** per app — Workers, Durable Objects, R2, Neon/PostgreSQL.

Software Engineer · React Native · GraphQL · Citrus Ads
May 2023 – Apr 2024
Zapp · London

- Owned end-to-end **Citrus Ads** — sponsored placements and banners; partnered with ops and Citrus's dev team; delivered solo.
- Built impressions and engagement tracking for sponsored ad analytics.
- Daily **GraphQL** architecture with backend as fulfilment scaled; trusted engineer owning large codebase areas early.

Software Engineer · React Native · Firebase
Mar 2021 – Apr 2023
Train Effective · London

- Mobile app redesign — React Native **component library** in Storybook for design–dev alignment.
- Integrated **Amplitude** for product analytics — events, funnels, and feature instrumentation.
- Trusted mobile team member; led developers across Tbilisi, Manila, Australia, and Russia.

Summer Technology Analyst · Legacy Systems · Red Hat OpenShift
Jun 2019 – Aug 2019
Barclays · London

- Implemented user preferences in Java on legacy banking systems; prepared Jira/Kanban workflow and release process.

Spring Technology Analyst · Artificial Intelligence · Cloud Computing
Aug 2018 – Sep 2018
Morgan Stanley · London

- Designed a trade-recommendation system for B2B clients in a collaborative team setting.
- Programme on cloud computing and AI including NLP — first exposure to natural language processing.

EDUCATION

Higher Education
BSc Engineering - 2:1 (*1st Class Honours in first year*)
University of Warwick · 2017 – 2019

A-Level
Mathematics - A · Philosophy - A(*S 194/200 UMS*) · Physics - B
Sharnbrook Upper School · 2015 – 2017

EXTRACURRICULARS

Apple Developer Community
WWDC annually; early SwiftUI, StoreKit 2, and SIWA in production.

2019 – Present

Indie App Builder
Solo **TrakStar Music** — React Native DSP via Spotify ISRC → HTML5 PIP.

Ongoing

Warwick Engineering Society
Hackathons, bridge-building comps, rapid prototyping nights.

2017 – 2019

Mobile Release Craft
Personal focus on App Store submission, release ops, screenshots, and production polish.

Ongoing

AI Product Experiments
Prototyping automation and AI-driven product ideas beyond day-job app work.

Ongoing

Open Source Exploration
Testing new tooling, SDKs, and mobile workflows to stay sharp across the Apple ecosystem.

PROFILE

Expert iOS engineer with 8+ years shipping mobile products across React Native and native Apple tooling. Built across Train Effective, Zapp, and App Next Day, with deep release, platform, and integration expertise beyond the JavaScript layer.

PLATFORMS

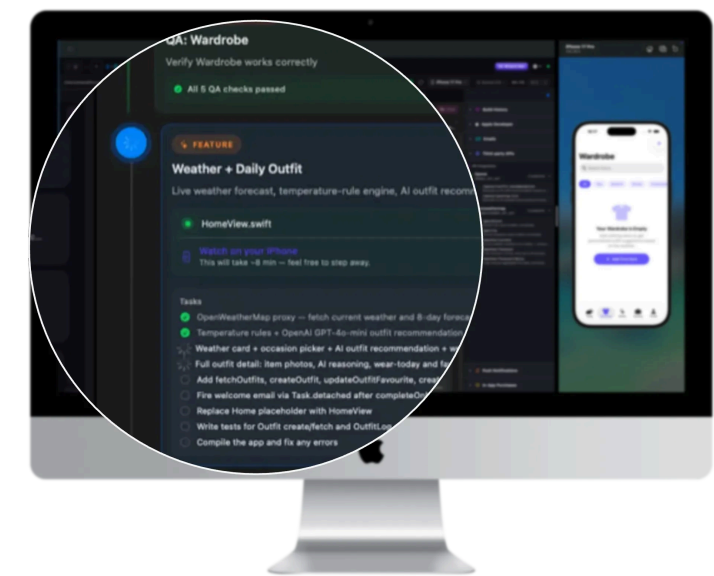

Build Targets
iOS, Android, watchOS, visionOS
Native Depth
Swift native modules, App Clips, Widgets, APNs, Sign in with Apple, StoreKit, certificates, code signing

CORE SKILLS

Mobile
React Native, TypeScript, JavaScript, Expo
Apple
Swift, SwiftUI, Xcode, StoreKit, Sign in with Apple, APNs
Backend
Node.js, GraphQL, REST, Firebase
Payments
Apple Pay, StoreKit 2, Stripe billing
Tools
CircleCI, Sentry, Stripe, Algolia, Git, App Store Connect

HIGHLIGHTS

- Apple ecosystem expert — SwiftUI, StoreKit 2, SIWA, APNs, ASC
- 1,500+ advanced Xcode projects built through Xcode Wizard
- 3 React Native apps live on the App Store
- Component library powering a full app redesign
- Native modules and App Store / Play Store release ownership
- Cloud ops: DNS, Cloudflare, GCP

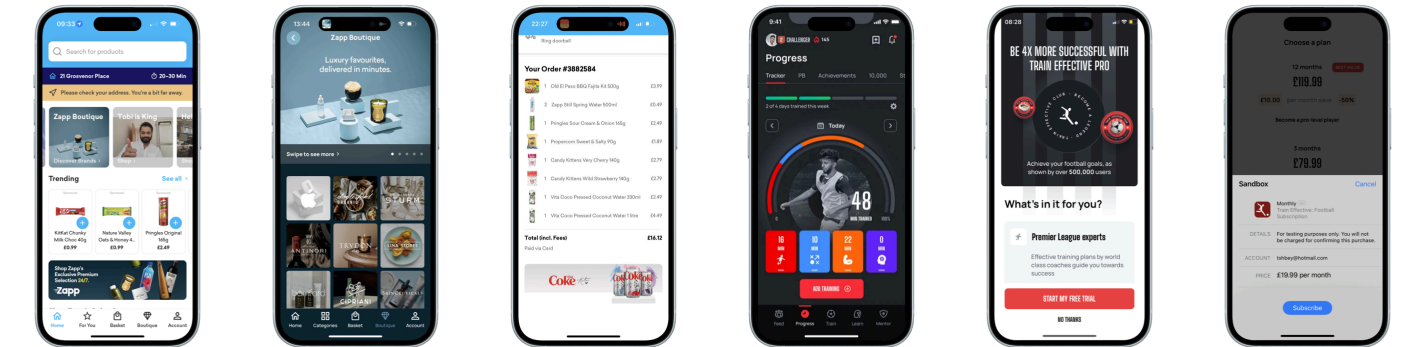

Xcode Wizard

PLATFORM

Native app factory — SwiftUI macOS, Node.js, per-app cloud backends
SIWA, StoreKit 2, APNs, ASC automation, Stripe billing
Planner + task execution pipeline for turning prompts into shipped native app projects
Build history, QA loops, and iterative file-level app generation
Cloudflare Workers, Neon/Postgres, and per-app backend provisioning
Third-party API exploration, billing, and App Store submission workflow support

xcwizard.com

Zapp

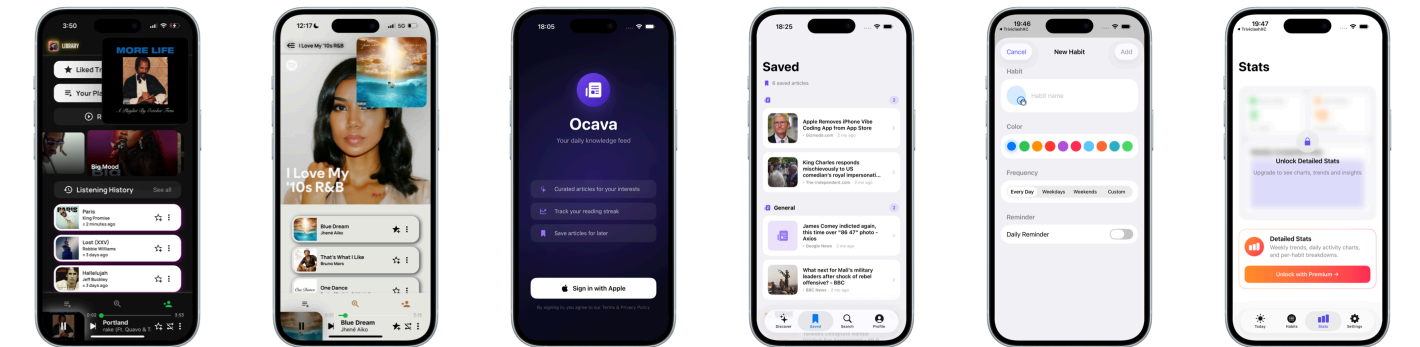

PREMIUM INSTANT DELIVERY COURIER

Citrus Ads — sponsored products and banner placements
Owned mobile integration with ops and external ad-tech team
High-frequency commerce app shipping under live demand

Train Effective

FITNESS APP

Owned the app redesign in React Native
Built and A/B tested multiple paywalls
Owned billing UX and subscription plumbing

TrakStar — Alternative Music Streaming Platform

100M SONGS · REACT NATIVE

Maps ISRC to HTML5 PIP for ad-free playback
£80/month running cost

IN SHORT

I'm an iOS engineer who ships — from React Native product work at Zapp and Train Effective to building Xcode Wizard and TrakStar solo. I'm used to owning a lot and want real responsibility: native modules, billing, App Store Connect, store release, and the Apple ecosystem details that make delivery work, including certificates, provisioning, and app signing. Open to senior iOS roles where someone needs to take a product over the line.
